

## CPU cooling paste white

### General information

This white cooling paste is to be applied in small quantity on the CPU before the cooler is being placed. Due to the special compound of the paste the heat is much better guided away from the CPU to the cooler.

This grease-like compound will not dry out, harden, or melt.

This paste is designed to provide optimal heat transfer from the CPU to the cooler.

### Features

This white cooling paste is to be applied in small quantity on the CPU before the cooler is being placed. Due to the special compound of the paste the heat is much better guided away from the CPU to the cooler.
