

Desoldering wick 2.54 mm 1.50 m

General information

CHEM-WIK is an advanced ultra-thin desoldering wick that responds even faster than any other desoldering wick. It's lighter gauge, pure copper braid construction allows better thermal conductivity, even at low temperatures. With CHEM-WIK, overheating of critical heat sensitive components and circuits is minimized because it requires less heat for a shorter period of time. CHEM-WIK also requires less "contact" pressure for greater operator comfort.

Specifications

Colour:	blue
Width:	2.8
Length:	1500

Sales information

Order code:	CHEM-WIK BB
Product description:	Desoldering wick 2.54 mm 1.50 m
Packaging:	Unpacked
Brand name:	ChemWik

Quantity	LxWxH (mm)	Weight
1	45x10x45	9 gr.
25	50x50x230	227 gr.
1000	255x295x400	9220 gr.
