

Smart card reader USB 2.0

General information

The reader is compatible with a wide range of smart cards and can be used for quick online identification by simply inserting a card. Personal information appears on-screen automatically without having to be entered manually. It can also be used for online tax reporting and banking or to impose restricted internet surfing for children. In addition, it is suitable for signing electronic documents with a legally binding electronic signature.

Features

- Quick identification by inserting the card into the reader; personal info appears on-screen without having to be entered manually
- Authentication for online tax reporting, banking or safe and restricted internet surfing for children
- Legally binding electronic signature to sign electronic documents
