

MC1

XTAR MC1 charger is a portable USB charger which can rescue your over-discharged batteries. It costs only one battery's price. It is a mini and light weight charger, but it can charge no matter the small cells like 10440 or the big cell like 26650!

Revolution Reinvented.

[Tiny but Mighty]

Ultra compact design with greatest compatibility.

3.6V/3.7V Li-ion / IMR / INR / ICR:

10440 14500 14650 16340 17335

17500 17670 18350 18490 18500

18650 18700 22650 25500 26650

[Micro USB Charging Port]

Charge Everywhere.

Compatible with all 5V USB power including USB wall adaptors, cell phone chargers, solar panel, PC USB, power banks, etc.

computer

power line

power bank

[0V Activation Function]

Recharge a "damaged" (Low voltage) battery.

Recondition and refresh old or over-discharged batteries.

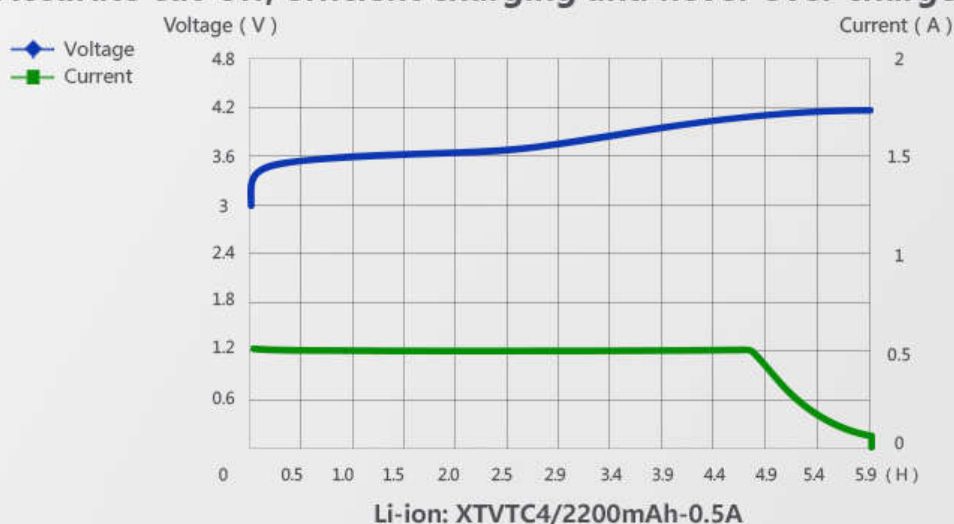

[Shock Resistant Technology]

No Accidents Will Stop Charging.

Prevents the battery from falling out in any cases.

[Battery Life Optimization Charging]

Accurate cut-off, efficient charging and never over charge batteries.

[The Safest Charger with Longest Warranty]

Safe, Durable and Peace of Mind.

CE, FCC, RoHS certified.

2 years warranty.

Extra-low safe input voltage.

Temperature monitoring.

Flame retardant material.

Reverse polarity and short circuit protection.

[MC1 Specification]

Input	DC 5.0V/500mA
Constant current output	500mA
Cut-off Voltage	4.2V
Operation Temperature	0-40°C

Net weight: 24g / Size: L92*W22*H26mm

[New Package Contents]

MC1 charger; USB cable,
Manual, Warranty card,
hop-pocket.

[Former Package Contents]

MC1 charger, USB cable,
Manual, Warranty card, hop-pocket.
